## Residential Compact Fluorescent Lighting Program

College Station's Residential Compact Fluorescent Lighting Program is available to CSU electrical customers for the purchase of compact fluorescent lights. CSU will credit your electrical

Keep your money in  
your wallet!

account \$1.00 for every incandescent light that you replace in your home with a compact fluorescent up to four replacements annually. In order to see the most benefits, it is recommended that you replace those lights that are most used in your home first and begin to replace others as they go out. To receive your rebate, simply clip and complete the attached rebate form, and mail along with your purchase receipt with your utility payment or mail to College Station Utilities, Attn: Rebate Offer, P.O. Box 9960, College Station, Tx. 77842.

- \* Available only to CSU residential electric customers.
- \* Limited to 4 CFL replacements or a total of \$4.00 annually.
- \* Purchase receipt required for rebate credit.
- \* Rebates credited to customer's account only.
- \* Rebate request form has no cash value.

### About Compact Fluorescent Lighting

Compact fluorescent lights have been available for several years to replace standard incandescent lights. Compact fluorescents are 8 times more efficient than incandescent bulbs with up to 10 times the life. They come in small wattages that produce as much light as standard 40 to 150 watt incandescent bulbs. They may be used in lamps, recessed cans, and outdoor lighting and are available in floodlights, three-way lights and dimmable lighting.

Get rid of those  
old, inefficient  
incandescents!

Replacement of one incandescent light with a compact fluorescent light is estimated to reduce approximately 100 pounds of carbon emissions per year.

### Lighting Options that save you money!

Lighting costs in your home can account for about 15% of your electric bill each month. Energy conscious use helps but instead of just switching off, switching to a more efficient light source can be most beneficial. Compact fluorescent lamps can reduce lighting costs by as much as 75% without reducing your lighting output. By reducing your lighting load you not only save money on lighting costs but by reducing heat gain. Compact fluorescent lights produce less heat than the standard incandescent lights thus reducing unwanted summer heat gain in your home that puts additional strain on your air conditioner.

Calculate your  
savings!

**Save energy and money!**

To receive your rebate, simply clip and complete the reverse rebate form, and mail along with your purchase receipt with your utility payment or mail to:

College Station Utilities,
